© 2026 GRC+

GRC+ wants everyone to be able to use this website, including people who use a screen reader, keyboard, magnification or voice control. This statement applies to grc.plus.

1 Standard

We aim to meet the Web Content Accessibility Guidelines (WCAG) 2.2 at level AA, the standard referred to by the European accessibility standard EN 301 549.

2 Where we stand

The website is **partially conformant** with WCAG 2.2 AA. The site was rebuilt in 2026 with accessibility in mind:

- pages work with a keyboard and have visible focus indicators;
- headings, landmarks and form labels are marked up for screen readers;
- text and button colours meet the AA contrast ratio; our brand guidelines reserve lighter colours for large text and decoration;
- the cookie bar and dialogs can be operated and closed with the keyboard;
- the site works when you zoom to 200 percent or more and on small screens.

Known gaps we are working on:

- some older articles and pages converted from the previous site may have missing image descriptions or an inconsistent heading structure;
- some downloadable PDF documents are not fully tagged for screen readers. Ask us and we will send the content in an accessible format;
- embedded third-party content, such as the meeting scheduler and the payment page, is provided by HubSpot and Stripe and follows their accessibility.

3 How we checked

This statement is based on a self-assessment carried out in October 2026 with automated testing tools and manual checks with a keyboard and a screen reader. We review it at least once a year and when we make large changes.

4 Tell us about a problem

If you cannot use part of the site, or need information in another format, e-mail sales@grc.plus. Tell us the page and what went wrong. We reply within 5 business days and try to provide the information in another way straight away.
